

# SALON SODARI

**Full-Stack Web Developer · Computer Engineering Student**

Kalanki, Kathmandu, Nepal | +977 974-2590718 | sodarisalon26@gmail.com
salonchand.github.io | github.com/SalonChand

## PROFESSIONAL SUMMARY

Computer Engineering undergraduate and independent full-stack developer with fourteen shipped projects — subscription SaaS, school management systems, e-commerce and real-time apps — most of them built alone from brief to deployment. Works across React, Next.js, TypeScript, Node.js/Express and MySQL, deploying on Vercel, Render and Aiven, and keeps software running for real users: a school, a resort and a fashion label. Background in teaching and graphic design shows in admin screens built for non-technical people.

## TECHNICAL SKILLS

- **Frontend:** React, Next.js, Vite, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind, Three.js, Progressive Web Apps (PWA), mobile-first design
- **Backend:** Node.js, Express, REST APIs, Socket.IO, WebRTC, JWT authentication, multi-tenant SaaS design
- **Databases & Cloud:** MySQL 8, SQLite, Prisma, Sequelize, Firebase (Auth, Realtime Database), Aiven, Supabase
- **Deployment & Tools:** Git & GitHub, Vercel, Render (Blueprints), GitHub Pages, pm2, PWABuilder, Capacitor, Windows/PowerShell
- **Other:** Python, Raspberry Pi, ffmpeg, Google Apps Script, security hardening (helmet, rate limiting, CORS), UI/UX and graphic design

## PROJECTS

**ThaliBill — Restaurant Billing SaaS** | React · Express · MySQL · Socket.IO

Live: thalibill.vercel.app · Vercel + Render + Aiven MySQL

- Multi-restaurant subscription platform with self sign-up, a super-admin panel for plans and approvals, and tiered sales statements (monthly to daily).
- Role separation by design: owners sign in by email; staff use restaurant code → name → PIN. One open order per table with version-checked edits and live Socket.IO updates.
- Extended into a second brand, Sajilo Pasal, for grocery shops with stock and credit (udharo) tracking under one shared admin.

**The Atelier — Luxury Fashion E-Commerce Platform** | JavaScript · Firebase · Three.js

Live: theatelier-ta.com

- Storefront plus admin console running the order pipeline, bulk QR-coded packing slips, seven-tier customer segmentation and a campaign engine with scope-aware discounts.
- 3D garment customiser with UV texture painting; automated weekly digest emails deduplicated by ISO week.

**JD Marksheets — School Management System (PWA)** | Express 5 · SQLite · Android

In daily use at John Dewey H.S. School, Kathmandu

- Separate portals for admins, grade teachers, subject teachers, students and guardians with strict per-role data isolation; digital marksheets, timetables, notices and guardian multi-child linking.
- Notification inbox backed by an Android companion app; leave requests fall back to SMS (Sparrow SMS / Twilio); auto-starts on the school's Windows machine.

**ByteTrack — Homework Management System** | Next.js · TypeScript · Express · MySQL

Live: bytetrack-pied.vercel.app

- Rebuilt a static app as a full-stack TypeScript system: theory, lab and project homework, checking sheets, PTM mode, parent notices, CAS marks, syllabus tracking and A4 reports.
- Migrated without reissuing existing student and parent PINs; added read-only HOD and principal logins.

**Milan — Dating App** | React · Express · Socket.IO · Prisma · MySQL · WebRTC

Live: milan-five-topaz.vercel.app

- Wrote a 28-section technical specification, then built it in nine phases: matching, real-time chat, WebRTC video calls and a separate moderation admin panel, all on free tiers.

**Hisab — Personal Finance & Invoicing** | React · Express · MySQL

- Invoices in NPR with payment QR, quotes, recurring billing, budgets, savings goals, PDF reports and Nepali BS dates; moved from a local pm2 PWA to Vercel/Render/Aiven and now opening as a free beta.

**Sangalo — Social Platform** | Next.js · Express · MySQL 8

Live: sangalo.vercel.app

- Feeds, profiles and conversations; migrated the database from MariaDB 10.4 to MySQL 8 to support JSON aggregation in the feed query.

**Karnali Riverside Resort — Resort Management PWA** | Node.js · Express · SQLite

- Guest booking and QR scan-to-order at tables, a shared kitchen and front-desk queue, and an admin console for rooms, menu and staff.

**JARVIS & Launcher — Personal Tooling** | Node.js · Express · SQLite · ffmpeg

- JARVIS: local AI assistant with a 33-tool registry and BM25 conversation memory. Launcher: iPhone PWA controlling a Windows laptop — webcam/mic streaming, file browser, process monitor, presentation clicker.

**Client Websites** | HTML/CSS/JS · Firebase · GitHub Pages

- John Dewey H.S. school site (31 pages, in-browser Python via Pyodide), Jacob Unisex Salon (bookings with Firebase sync, revenue per stylist), and Pariwartan band site (Devanagari typesetting, sourced discography).

**In Development**

- **Deal Rush** (deal-rush-five.vercel.app) — real-time multiplayer card game, server-authoritative, React · Socket.IO · Prisma.
- **SAJILO** — Shop / Ride / Send super app for Nepal, modular monolith on Next.js · Express · MySQL.
- **LocalAid Nepal** and **Eco Tour Nepal** — community aid PWA with SOS, and a tours + handicrafts marketplace with JWT-secured sockets.

## EXPERIENCE

- **Independent Full-Stack Developer:** designed, built, deployed and maintained web applications for a school, a resort, a fashion brand and other clients, end to end.
- **Teaching — 3 years:** classroom teaching of Computer Science and Mathematics, including lesson materials and presentations.
- **Graphic Design — 6 months:** freelance graphic design and editing work; 2 years of drawing and painting practice.

## EDUCATION

**Bachelor of Engineering (BE) in Computer Engineering** — Expected 2027
Himalayan Whitehouse International College, Kathmandu

**+2 in Science** — 2080 BS (2023 AD) · GPA 2.90
Morgan International College, Kathmandu

**Secondary Education Examination (SEE)** — 2077 BS (2021 AD) · GPA 4.0
Cambridge English School, Bardiya

**Basic Level Examination (BLE)** — 2075 BS · GPA 3.82
Cambridge English School, Bardiya

## PERSONAL DETAILS

Date of Birth: 2004-09-11 · Nationality: Nepali · Languages: English, Nepali · Interests: Coding, Drawing, Traveling, Music
